Worth heavy weight split rings are used in applications where strength is the most important requirement. They are made from heavier gauges of spring-tempered steel wire, making them extremely strong for their size. These rings are ideal for large game fish such as musky and northern pike. They are available in four popular sizes, and finished in either nickel plate or bright zinc plate.

Keep Your Split Ring's Memory!

Proper split ring assembly is imperative, so don't compromise the memory. To accomplish this, keep the ring and the blade on the same plane as much as possible. Insert the blade between the two coils and spin the ring onto the blade, lifting the ring (changing the angle) only enough to aid the assembly. Always try and assemble the blade where the least distance is achieved between the hole and the edge of the blade.
